Background

Propcom+ is an eight-year (2023-2030), rural and agricultural market development programme supporting climate-resilient and sustainable agriculture and forestry that benefits people, climate and nature. The programme is funded by the Foreign, Commonwealth and Development Office (FCDO) and implemented by The Palladium Group.

Propcom+ aims to transform Nigeria's rural economy by addressing environmental, social, and economic challenges in the country's food and land-use system. It will do this by (i) increasing productivity, improving nutrition and food security, (ii) enhancing climate resilience, pursuing lower emissions, protecting and restoring nature, and (iii) helping tackle some of Nigeria's underlying drivers of conflict and insecurity.

The programme seeks to stimulate sustainable pro-poor climate-resilient growth in selected rural markets. It does this by working as a 'market facilitator', identifying constraints in market systems and facilitating changes to enable rural markets to work better for the benefit of the poor and climate-vulnerable smallholder farmers and rural small-scale entrepreneurs.

Propcom+ aims to increase the incomes and climate resilience of 3.79 million poor and vulnerable men and women in Nigeria, 50% of whom will be women, through a "3Ps" approach of interlinked components:

P1: Scaling up a focused basket of **Proven** climate-smart interventions around agricultural and primary processing/storage practices and models to get these adopted by millions of poor and vulnerable smallholder farmers and small-scale entrepreneurs.

P2: Building markets by developing and **Piloting** new business models that improve productivity, enhance resilience to climate change, reduce emissions, and improve nutrition outcomes.

P3: Enabling Policies that support a strengthened enabling environment for sustainable food and land-use system.

The programme adopts a two-tier approach to regional and state-level implementation. Tier 1 states are currently from North-West (NW) and North-East (NE) Nigeria and are considered priority states delivering climate-smart agriculture to help the poor and climate-vulnerable. Tier 2 States are currently from Southern Nigeria and will have a more focused set of priorities on deforestation-free commodities.
